New Delhi, India

Summary

AI-focused Product Manager with experience building data-driven workflows, CRM automations, analytics systems, and LLM-powered prototypes. Skilled in Python, SQL, API integrations, prompt engineering, workflow automation, and translating business problems into scalable AI-enabled solutions. Combines product thinking with engineering execution to build intelligent systems that improve decision-making and operational efficiency.

Experience

Product Manager - L1 **Mar 2025 – Apr 2026**
Eshopbox E-commerce Private Limited *Gurugram, India*

- Redesigned the custom returnability request workflow for enterprise brands, including a standardized intake process and in-app upgrade path that cut resolution time from 3 days to under 2 hours and generated 15+ subscription upsells.
- Built SQL-powered operational dashboards integrating CRM and warehouse data to provide Sales & CSM teams with real-time visibility into brand performance metrics. Enabled every account stakeholder to proactively manage brand operations while helping leadership define the organization's NSM from brand acquisition to shipment volume, directly aligning sales incentives with revenue-generating customer activity and contributing to 19% revenue growth.
- Built Python-assisted data processing workflows to migrate, normalize, deduplicate and enrich 70k+ customer records across HubSpot and Zoho, creating a unified customer intelligence layer while reducing CRM costs by 60%.
- Designed workflow automations across CRM systems using Zoho automation, APIs, and data-driven processes, reducing sales cycle time by 80% and lowering CP-SQL by 60%.
- Built real-time CRM dashboards and reporting systems to track lead quality across ads, ad sets, creatives, and campaigns, enabling marketing optimization, sharper customer targeting, reduced ad spend, and a 50% increase in the MQL → SQL conversion ratio.

Product Management Intern **Dec 2024 – Apr 2025**
Pragmatix Learning Edutech Private Limited *Kerala, Remote*

- Validated market demand for a new B2C coaching vertical through competitor intelligence, AI-assisted research and rapid prototype development using OpenAI/ChatGPT, Claude, Perplexity and v0.dev.

Product Consultant **Apr 2023 – Sep 2024**
Expand My Business *Gurugram, India*

- Analysed client business requirements and market data across 20+ deals (INR 85L+ TCV) to scope technical solutions and align supply with specialised IT agencies, generating INR 25L+ in profit.
- Translated complex client data and business requirements into structured PRDs and technical specifications, bridging business stakeholders and engineering teams for accurate product scoping and delivery.

Data Analyst **Sep 2022 – Mar 2023**
Quality Council of India *New Delhi, India*

- Cleaned, standardized and validated large datasets using Excel and SQL for Padma Awards 2022.
- Built reporting datasets and conducted analytical reviews across 50+ ULB bodies to support compliance monitoring, certification reporting and audit processes.

Education

B.E. Information Technology, NSIT (6.0/10) **New Delhi — 2022**
XII CBSE, Salwan Public School (91%) **New Delhi — 2017**

Certifications & Skills

Certifications: NextLeap - Product Management Fellowship | PepCoding - Data Structures & Algorithms
